MOVE AHEAD

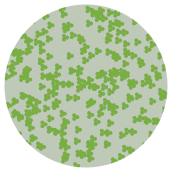

→ **Ahead 3**

Mulch

Keeps the soil cool and damp.

MOVE AHEAD

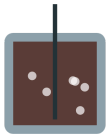

→ **Ahead 4**

Cover crop

Living roots feed the fungi.

⊕ 1 more with **Broadfork**

MOVE AHEAD

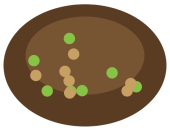

→ **Ahead 3**

Compost tea

Wakes up the soil life.

⊕ 1 more with **Rain barrel**

MOVE AHEAD

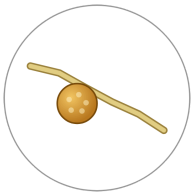

→ **Ahead 3**

Compost ready

Dark, crumbly food for the soil.

MOVE AHEAD

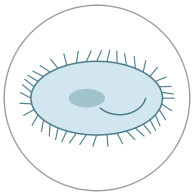

→ **Ahead 3**

Fungi spread

Threads carry water and food to roots.

⊕ 1 more with **Cover crop seeds** or **Compost tea**

MOVE AHEAD

→ **Ahead 2**

Protozoa feast

They eat bacteria and leave plant food behind.

MOVE AHEAD

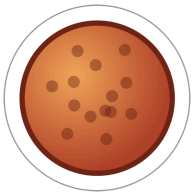

→ **Ahead 2**

Rain

A soft rain soaks in.

⊕ 1 more with **Mulch** or **Rain barrel**

MOVE AHEAD

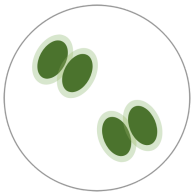

→ **Ahead 4**

Mycorrhizal partner

Fungi trade phosphorus for root sugar.

MOVE AHEAD

→ **Ahead 3**

Nitrogen fixer

Bacteria pull nitrogen from the air.

MOVE AHEAD

→ **Ahead 2**

Bees visit

Flowers bring pollinators.

MOVE AHEAD

→ **Ahead 3**

Harvest day

You picked at just the right time.

MOVE AHEAD

→ **Ahead 3**

Microscope check

You found what your soil needs.

⊕ 1 more with **Predator nematodes** or **Magnifying lens**

MOVE AHEAD

→ **Ahead 2**

Saved seeds

Seeds from your best plant.

MOVE AHEAD

→ **Ahead 3**

Earthworm tunnels

Air and water get in.

MOVE AHEAD

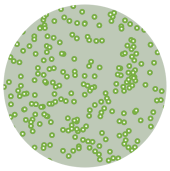

→ **Ahead 3**

Wood chips

Fungi love woody food.

MOVE AHEAD

→ **Ahead 3**

Living mulch

Clover between the rows feeds the soil.

MOVE AHEAD

→ **Ahead 2**

Warm spring day

Warm soil wakes up the soil life.

MOVE AHEAD

→ **Ahead 2**

Kitchen scraps

Peels and cores feed the worms.

MOVE AHEAD + GO AGAIN

↻ **Ahead 3**
and go again!

Worm party

Castings everywhere!

⊕ **1 more with Compost** or **Compost tea**

MOVE AHEAD + GO AGAIN

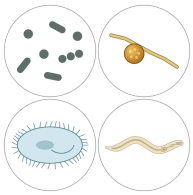

↻ **Ahead 2**
and go again!

Perfect rain on mulched soil

Not a drop wasted.

MOVE AHEAD + GO AGAIN

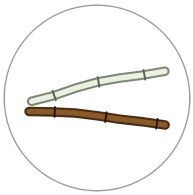

↻ **Ahead 2**
and go again!

Food web complete

Everyone's eating everyone.

MOVE AHEAD + GO AGAIN

↻ **Ahead 3**
and go again!

No-dig bonus

Years of fungal threads left whole.

MOVE AHEAD + SHED CARD

→ **Ahead 1**
and take a Shed card

Garage sale

Someone sold a garden tool for a few coins.

MOVE AHEAD + SHED CARD

→ **Ahead 1**
and take a Shed card

Neighbour's gift

Your neighbour shares from her shed.

MOVE AHEAD + SHED CARD

Ahead 1
and take a Shed card

Garden club swap
Friends trade what they have extra.

MOVE AHEAD + SHED CARD

Ahead 1
and take a Shed card

Birthday present
Someone knows you love gardening!

MOVE AHEAD + SHED CARD

Ahead 1
and take a Shed card

Cleaned out the shed
Look what was hiding in the corner!

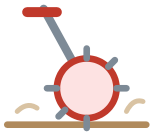

MOVE AHEAD + SHED CARD

Ahead 1
and take a Shed card

Tool library
Borrow what you need for free.

MOVE BACK

Back 2

Tilling
Breaks the fungal threads.

Can't be stopped. Some damage can't be undone.

MOVE BACK

Back 1

Bare soil storm
Your topsoil washed away.

Stop it with **Mulch** or **Cover crop seeds**

MOVE BACK

Back 1

Microplastic
A plastic bit got into your soil.

Can't be stopped. Some damage can't be undone.

MOVE BACK

Back 2

Packed soil
Feet and wheels squeezed out the air.

Stop it with **Broadfork**

MOVE BACK

Back 1

Heat wave
Bare soil bakes and life hides.

Stop it with **Mulch**

MOVE BACK

Back 2

Root-feeder attack
Spear-mouthed nematodes chew the roots.

Stop it with **Predator nematodes**

MOVE BACK

Back 1

Weeds take over
They stole the water.

Stop it with **Cover crop seeds**

MOVE BACK

Back 1

Hungry soil
Nothing left to eat.

Stop it with **Compost**

MOVE BACK

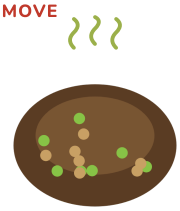

Back 2

Salt crust

Quick fertilizer left salt behind.

Can't be stopped. Some damage can't be undone.

MOVE BACK

Back 1

Sour pile

No air, so the compost rotted.

Can't be stopped. Some damage can't be undone.

MOVE LOSE A TURN

Lose a turn

Too much fertilizer

It burned your seedlings.

Stop it with **Compost**

MOVE LOSE A TURN

Lose a turn

Waterlogged

The roots can't breathe.

Stop it with **Broadfork**

MOVE LOSE A TURN

Lose a turn

Drought

Everything's waiting for rain.

Stop it with **Rain barrel**

MOVE LOSE A TURN

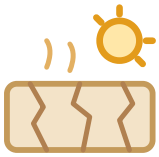

Lose a turn

Sleepy soil

Hardly any life after the bag mix.

Stop it with **Compost tea**

MOVE SOIL LIFE DOWN

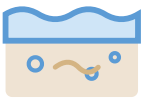

Fungi –1

Sun-baked soil

Bare soil in the hot sun dries out the fungi.

Stop it with **Mulch**

MOVE SOIL LIFE DOWN

Fungi –1

Nematodes –1

Flooded bed

Standing water smothers the fungi and nematodes.

Stop it with **Broadfork**

MOVE SOIL LIFE DOWN

Bacteria –1

Protozoa –1

Fertilizer shock

Strong quick fertilizer stuns the bacteria and protozoa.

Stop it with **Rain barrel** or **Compost**

MOVE SOIL LIFE DOWN

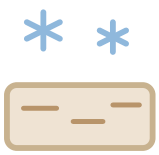

Nematodes –1

Pesticide spray

It kills the helpful nematodes too.

Can't be stopped. Some damage can't be undone.

MOVE SOIL LIFE DOWN

Bacteria –1

Bare all winter

No living roots, so the soil life goes hungry.

Stop it with **Cover crop seeds**

MOVE SOIL LIFE DOWN

Protozoa –1

Chlorine water

Tap water with chlorine hurts the protozoa.

Stop it with **Rain barrel**

MICROSCOPE BACTERIA

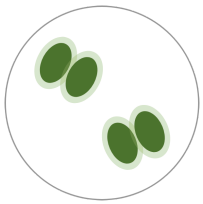

Bacteria

Tiny dots and rods: the base of the soil food web.

+1 Bacteria

MICROSCOPE BACTERIA

Azotobacter

Fat paired cells that turn nitrogen from the air into plant food.

+1 Bacteria

MICROSCOPE BACTERIA

Purple bacteria

Purple-red rods that use light and clean up smelly, sour spots.

+1 Bacteria

MICROSCOPE BACTERIA

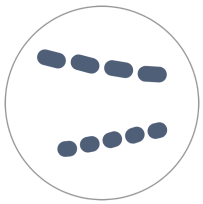

Purple bacteria rosette

Purple rods spreading out from a soft centre, like a flower.

+1 Bacteria

MICROSCOPE BACTERIA

Lactic acid bacteria

Rods in short chains that ferment, as in bokashi and sauerkraut.

+1 Bacteria

MICROSCOPE BACTERIA

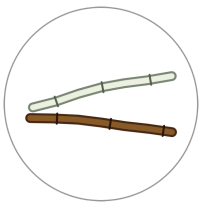

Actinobacteria

Thin, branching threads that give soil its earthy smell.

+1 Bacteria

MICROSCOPE FUNGI

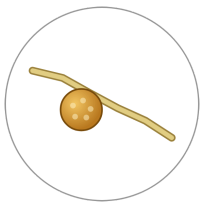

Decomposer fungus

Wide, even threads with cross-walls. It breaks down woody stuff.

+1 Fungi

MICROSCOPE FUNGI

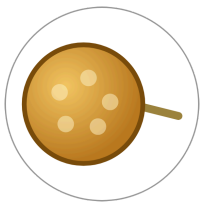

Mycorrhizal fungus

No cross-walls, round spores. It trades water for root sugar.

+1 Fungi

MICROSCOPE FUNGI

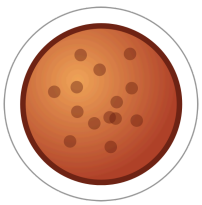

Mycorrhizal spore

A big round spore that grows a new root-partner thread.

+1 Fungi

MICROSCOPE FUNGI

Acaulospora spore

A pitted orange-red root-partner spore of young volcanic ash soils.

+1 Fungi

MICROSCOPE FUNGI

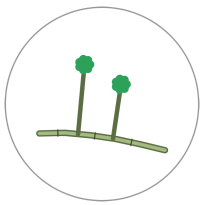

Forest root-partner spores

Small brown warty spores of fungi that wrap tree roots.

+1 Fungi

MICROSCOPE FUNGI

Trichoderma

Right-angle branches and green spore tufts. It guards roots.

+1 Fungi

MICROSCOPE · FUNGI

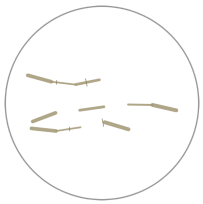

Yeast

A one-celled fungus that buds off little daughter cells.

+1 Fungi

MICROSCOPE · FUNGUS LOOKALIKE

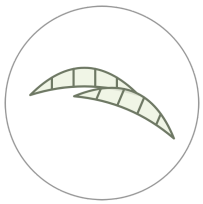

False fungus

Thin, wispy, broken threads. Not a true fungus.

–1 Fungi

MICROSCOPE · DISEASE FUNGUS

Fusarium spores

Clear curved canoes with cross-walls. It can cause root rot.

–1 Fungi

MICROSCOPE · DISEASE FUNGUS

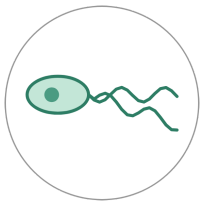

Alternaria spore

A dark brown club with a beak and a brick-wall pattern.

–1 Fungi

MICROSCOPE · PROTOZOA

Flagellate

A small oval that whips about with its tails and eats bacteria.

+1 Protozoa

MICROSCOPE · PROTOZOA

Naked amoeba

A shape-changing blob that squeezes into tiny pores to eat bacteria.

+1 Protozoa

MICROSCOPE · PROTOZOA

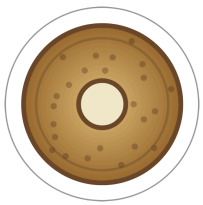

Testate amoeba

It lives in a shell and pokes a soft foot out of the opening.

+1 Protozoa

MICROSCOPE · PROTOZOA

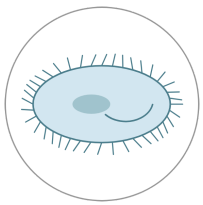

Arcella

A shelled amoeba that looks like a little brown donut.

+1 Protozoa

MICROSCOPE · PROTOZOA

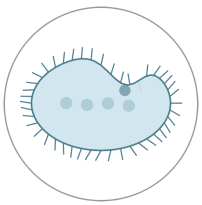

Ciliate

Covered in tiny hairs (cilia). A fast swimmer that eats bacteria.

+1 Protozoa

MICROSCOPE · PROTOZOA

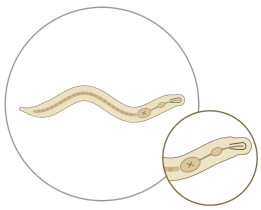

Colpoda

The commonest soil ciliate, shaped like a kidney bean.

+1 Protozoa

MICROSCOPE · NEMATODES

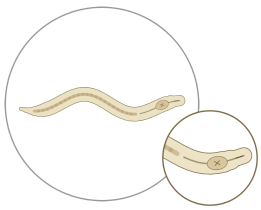

Bacteria-eating nematode

An open tube mouth. It eats bacteria and releases plant food.

+1 Nematodes

MICROSCOPE · NEMATODES

Fungus-eating nematode

A thin, small spear for piercing fungal threads.

+1 Nematodes

MICROSCOPE · NEMATODE (PEST)

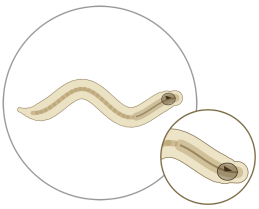

Root-eating nematode

A big spear with knobs that stabs roots. A pest!

Lose a plant (safe if Nematodes 2+)

MICROSCOPE · NEMATODES

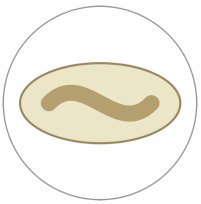

Predatory nematode

A big mouth with a tooth. It eats other nematodes.

+1 Nematodes

MICROSCOPE · NEMATODES

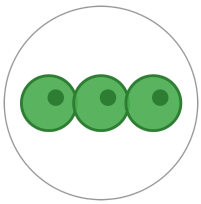

Nematode egg

A smooth oval egg. Sometimes a little worm is coiled inside.

+1 Nematodes

MICROSCOPE · ALGAE

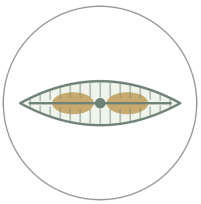

Algae

Green cells that make their own food from sunlight.

Nothing happens

MICROSCOPE · ALGAE

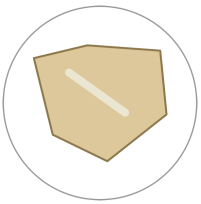

Diatom

A living alga in a glass shell, shaped like a little boat.

Nothing happens

MICROSCOPE · NOT SOIL LIFE

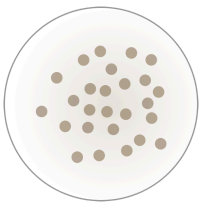

Sand grain

An angular mineral grain. Not alive: the soil's skeleton.

Nothing happens

MICROSCOPE · NOT SOIL LIFE

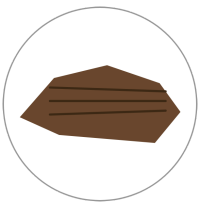

Clay flakes

Too tiny to see one by one: a faint, fuzzy haze and clumps.

Nothing happens

MICROSCOPE · NOT SOIL LIFE

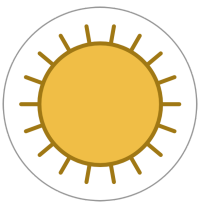

Organic bits

Brown bits of old plants: food for the soil life.

Nothing happens

MICROSCOPE · NOT SOIL LIFE

Pollen

A spiky grain from a flower, blown or washed into the soil.

Nothing happens

MICROSCOPE · NOT SOIL LIFE

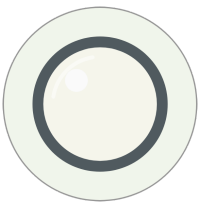

Microfiber

A thread from clothing. Litter, not soil life.

–1 any soil life

MICROSCOPE · NOT SOIL LIFE

Air bubble

A dark ring with a bright middle, from making the slide.

Nothing happens

Microscope cards

KEEP THIS CARD FACE UP

Do what the card says, then put it under the deck.

Root-eating nematode: Lose one plant, unless your Nematodes are 2 or more

Microfiber: –1 on any one track

Bacteria: +1 Bacteria

Fungi: +1 Fungi

Protozoa: +1 Protozoa

Nematodes: +1 Nematodes

Fungus lookalike, Disease fungus: –1 Fungi

Algae, Not soil life: Nothing happens
